MISSION BRIEFING:

Agents Whitewolf and Black Sand were recently involved in an accident in Minneapolis, MN. Deemed an auto accident, Black Sand unfortunately did not make it out alive. Suffering burns over 95 % of her body while trapped in Whitewolf's Ferrari Enzo, Black Sand died a very horrible and agonizing death. Her body was sent to Abbott Northwestern Hospital where all mortuary responsibilities and an autopsy were performed. Both Agents were investigating Jonathan Pollard, a MN elected state securities liaison to the U.S. Federal Gov. who has apparently gone missing since this morning. Mr. Pollard was the MN directorate for one of the state's securities divisions that protects vital areas around the state from possible terrorist attacks. It was suspected that Mr. Pollard had been compromised and was leaking vital securities info to some unknown radical organizations. The Agency is led to believe that Mr. Brent Styles, a.k.a. Agent Skynet, who has recently gone rogue from the Agency, may be behind the suspected murder attempt. Your mission is to investigate the death of Agent Black Sand and bring her perpetrator to justice by any means necessary, along with any information on Mr. Pollard and any connection to any unethical organizations. The Agency has lifted any limitation on casualties for this mission.

MISSION DEBRIEFING:

Mission completed 10:00 pm on 9-23-08.

Agents made their way to Minneapolis MN where they went straight to the morgue located at Abbot Northwestern Hospital. Posing as a DHS team they Agents gained access to Black Sand's body and found out that she was in fact murdered from a bullet wound of some sort. Starting fresh the next day, the team investigated the accident scene and deduced that Black Sand's shooter must have been perched in the Parking Ramp down the street. Further information from the surrounding community, confirmed their theory. After some breaking and entering, the Agents acquired a security tape that revealed the shooters vehicle, hence the license plate and address. The Agents proceeded to locate and acquire the shooters vehicle and computer assisted computer system after being involved in a scuffle with some local gang members. Agents proceeded to a weapons manufacturing facility near Rochester MN where they engaged in a very brutal firefight. The Agents were able to overcome their adversaries via the use of a vehicle flamethrower, killing the driver of a moving Semi truck by leaping through the window and the use of a gadgetized cell phone that produced a cone of fire at its victim, which ended up with a massive explosion and the elimination of the threat. Jonathan Pollard's body was found dead with no further information. Evidence was found that directly links Brent Styles, a.k.a. Agent Skynet, with the murder and attempted murder of Agents Black Sand WhiteWolf. The Agency has taken care of covering up any involvement with the facility by releasing a cover story of an accidental WP explosion that destroyed the facility and all who worked there.
