PLACE: N/A

MISSION BRIEFING:

The Agency has just been notified that a secret meeting consisting of suspected international government intelligence traffickers will be taking place in Washington D.C. and one of the groups key players, Kamiel Habib, will be arriving at Dulles International Airport in one hour. He has been known to transport all kinds of government and national security information between various democratic, communist and totalitarian government nations. The Agency believes that he has accumulated millions of dollars over the last five years, due to the highly sensitive material that he has transported. It is imperative that he does not attend this meeting. Your mission is to locate Kamiel Habib and bring him back to the Agency along with any information he may be transporting. Nothing is known of the level of security he may possess or travels with, but casualties must be kept to a minimum and with zero public awareness.

MISSION DEBRIEFING:

Mission completed 5:15 pm on 02/02/07.

Agents made their way to Dulles International Airport and set up surveillance posts throughout the airport's terminals, baggage claim and ground transportation curb. Agents detected possible assistants making their way to intercept the suspect to help escort him out of the airport. After two accounts of possible exposure, due to a miscalculation of airport refuge canister placement and an attempt to keep in contact with the suspect on the airport tram, Agents followed Kamiel Habib to the Internationals Arrivals Building and baggage claim. Suspect suddenly unleashed a barrage of bullets from a briefcase submachine gun while trying to make an exit out of the airport with two of his assistants. A couple of well-planned Agent attacks to the assistants, via a tazer gun to the sternum of one along with a fake flying kick into a two-handed ground pushup, to a knockout cranium kick to the other, incapacitated both of them. Suspect escaped outside the airport but was halted by an Agent vehicular bump technique, in which the suspect was catapulted to the ground, picked up and later transported back to the Agency for an extensive interrogation in which all suspected critical information was retrieved.
