ORGANIZATION BACKGROUND: _____

GEHM-TECH, or Genetically Enhanced Human Mutation Technologies, was founded by Leonard Christopherson with support from Anna Yuarez in mid 2007 out of sheer necessity. Miss Yuarez was infected with a foreign substance in the field where it caused her body to undergo multiple genetic and biological mutations. Dr. Christopherson has been studying and documenting her genetic mutation progress ever since the infection, and later felt he could better research and develop a cure for Miss Yuarez if he had his own research laboratory. A proposal for the Agency to privately fund the research laboratory was acknowledged, discussed and accepted.
