**ORGANIZATION BACKGROUND:**

The Joint Operations Group is a covert operations agency of the United States, working directly for the Chairman of the Joint Chiefs of Staff. Headquarters are located at an undisclosed location in Florida, with other facilities in Nevada, Virginia, and Washington, D.C.

The JOG was originally conceived as a covert operations force, formed from a hastily thrown together group of U.S. special forces operators and language trained specialists, in late 1990.

The JOG was instrumental in acquiring intelligence for Operation Desert Storm. After Desert Storm, the JOG expanded during the mid 1990's, and slowly grew by word of mouth.

The general public knows nothing of the Joint Operations Group's existence, which are covert, and kept that way by misdirection, concealed from all but the highest echelons of government. Perhaps 1 in 500 operations have had any sort of tie to the agency.
