ORGANIZATION BACKGROUND: _____

The cult group has advocated against the Catholic Church on many occasions, accusing them of religious injustice throughout the ages and has been under surveillance for the past twenty years. The Agency has not yet established who the leader of the group is and suspects that there may not have been one. The group has publicly announced its obsession with Satan as its leader and has performed many rallies and demonstrations against the Catholic Church in France and Italy. Twelve members of the organization were caught planning and attempting an assassination on Pope John Paul II in 1999 where poison was to be secretly digested by the Pope in his evening supper. After unpublicized charges were filed along with Agency pressure, the group seems to have disbanded.
